"The painting shouts youth and sunshine. It has an effervescent energy and an iridescent glow. It would really suit a young family – in a family room and kitchen all light bright and sunny. White walls, a pop of yellow and honey timbers coupled with Danish or Swedish classic furniture – also all honeyed – of course!"

Jane Stark

"This painting has great texture and rhythm created with the lined brush strokes. It has a cool soothing palette, yet is not at all passive. It would work well in a room with warmer tones, like oak floors to enhance the ochre details and perhaps with a raspberry sofa. At this size it would definitely demand a large space or it could overwhelm the environment."
